DECLARATION

We hereby declare that the Intra-Disciplinary Project-II entitled “**LIBRARY MANAGEMENT SYSTEM**” is being submitted by **J.Hamsini(201FA04443), D.Akhila(201FA04448), CH Naga Alekhya(201FA04457)** in partial fulfillment of Intra-Disciplinary Projects-II course work. This is our original work, and this project has not formed the basis for the award of any degree. We have worked under the supervision of **Dr.B.Samatha,,Assistant professor, Mrs.G.Keerthi, Assistant professor** from the Department of Computer Science & Engineering.

1.INTRODUCTION

1.1 Introduction

- Library is a place where all kinds of books are available. The Library Management System is an application for assisting a librarian in managing a book library in university.
- The system would provide a basic set of features to add/update members, add/update books, and manage check-in specifications for the systems based on the reader's statement of need.

1.2 Objective

- The development of this new library management system contains the following activities, which try to automate the entire process.
- Automates information related to all book.
- Providing security.
- Maintaining database for all above include reservations of books.
- Time saving.

1.3 Project description

- Library Management System maintains the information about the books present in the library, their authors, the members of library to whom books are issued, library staff and all.
- This is very difficult to organize manually & maintenance of all this information is also a very complex task.
- So, our project would provide basic set of features to add/update members, add/update books, and manage check in specifications for the systems based on the client's statement of need.
- Student's can search books based on the subject name.
- They can send Remarks.
- They can check the availability of books.
- Admin can manage records very easily using this software.
- This software reduces time consumption ,space consumption and increases efficiency.

2.REQUIREMENTS AND SPECIFICATIONS

2.1Software Requirements

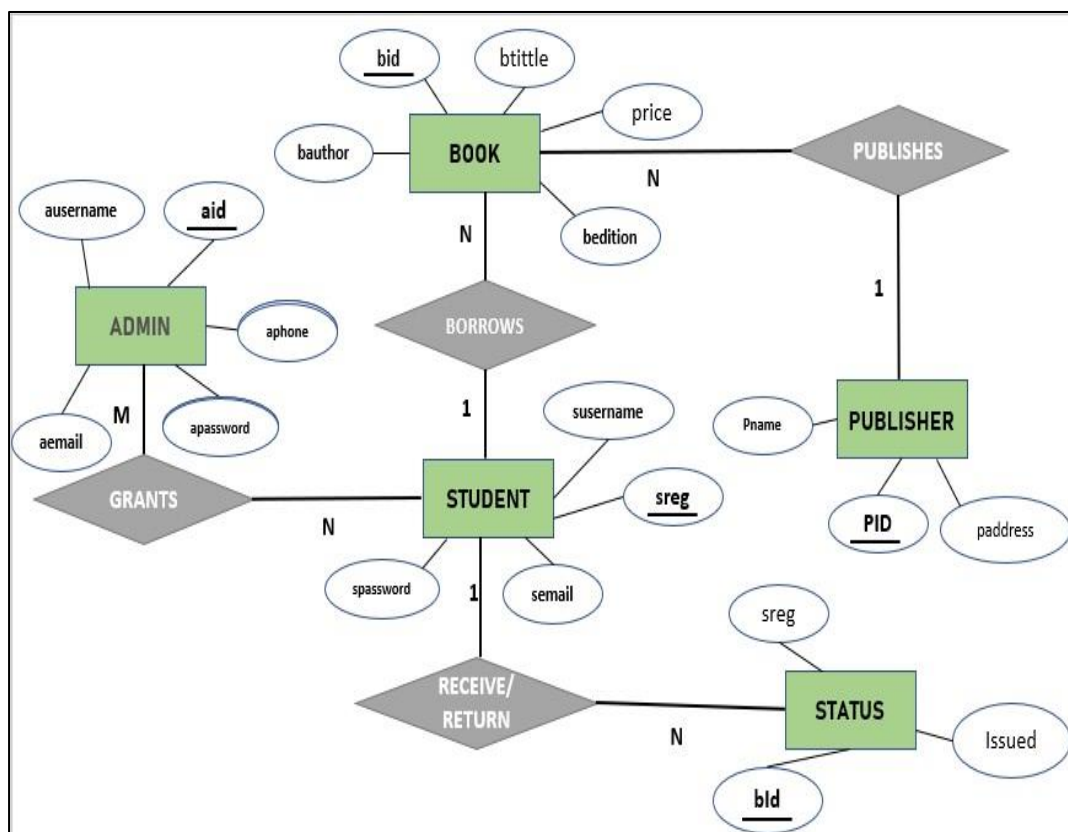

- MY SQL Workbench 8.0 CE
- MY SQL connector
- NetBeans IDE 8.2
- Front-End: JSP, Html, CSS, JS.
Server-side: Servlet.
Back-end: MYSQL.
Server: Tomcat 10.0.21.

2.2Hardware Requirements

- Basic requirements of computer(No specific requirements are required to run this library management system.

3.DESIGN

3.1 ER diagram

3.2 Database schema

4.IMPLEMENTATION

4.1 Database

- create database lms;
- use lms;
- create table studentregistration(susername varchar(40),spassword varchar(40),sreg varchar(40) primary key,semail varchar(40));
- create table adminregistration(ausername varchar(40),apassword varchar(40),aphone varchar(40) ,aid varchar(40) primary key,aemail varchar(40));
- create table publisher(pid varchar(40)primary key,paddress varchar(40),pname varchar(40));
- create table book(btittle varchar(40),bid varchar(40) primary key,bcategory varchar(40) ,bprice varchar(40),bauthor varchar(40),bedition varchar(40),pid varchar(40),foreign key(pid) references publisher(pid));

- create table status(bid varchar(40),sreg varchar(40),issued varchar(40),dued varchar(40),foreign key (bid) references book(bid),foreign key (sreg) references studentregistration(sreg),primary key(bid,sreg));
- create table remarks(sreg varchar(40),remarks varchar(500),foreign key (sreg) references studentregistration(sreg));

4.2 Sample source code

HTML Code:

```
<!DOCTYPE html>
<html>
head>
<title>adminlogin</title>
<style>
body
{
    background-image:url('adminregistration.jpg');
    background-repeat:no-repeat;
    background-attachment:fixed;
    background-size:100% 100%;
}
table
{
    border:solid 5px;
    border-color:black;
}
</style>
</head>
<body>
<form name="adminlogin" action="adminlogin" method="">
<table cellpadding="10" style="position:relative;left:750px;top:50px;">
<tr>
<td>
a_id :<input type="text" name="aid" placeholder="ex:20A010" required> <br><br>
Password:<input type="password" name="apassword" placeholder="Password"
required>
<br>
<input type="reset" value="Reset">
<buttonon click=validate(); >Login </button>
</td>
</tr>
</pre>
</table>
</form>
</body>
</html>
```

Servlet Code:

```
import java.io.IOException;
import java.io.PrintWriter;
import java.sql.Connection;
import java.sql.DriverManager;
import java.sql.PreparedStatement;
import java.sql.ResultSet;
import java.sql.SQLException;
import javax.servlet.RequestDispatcher;
import javax.servlet.ServletException;
import javax.servlet.http.HttpServlet;
import javax.servlet.http.HttpServletRequest;
import javax.servlet.http.HttpServletResponse;
public class Adminlogin extends HttpServlet {

    public void doGet(HttpServletRequest req, HttpServletResponse res)
        throws ServletException, IOException {
        res.setContentType("text/html;charset=UTF-8");
        PrintWriter out = res.getWriter();
        String admin=req.getParameter("aid");
        String pass=req.getParameter("apassword");
        try{
            Class.forName("com.mysql.cj.jdbc.Driver");
            Connection con = DriverManager.getConnection("jdbc:mysql://localhost/lms","root","29H072003*");
            PreparedStatement stmt=con.prepareStatement("select apassword from adminregistration where aid='"+admin+"'");
            ResultSet rs=stmt.executeQuery();
            String dbpass=null;
            if( rs.next()){
                dbpass = rs.getString(1);
            }
            int l=1;
            if(pass.equals(dbpass))
            {
                l=0;
            }
            if(l==0)
            {
                RequestDispatcher rd=req.getRequestDispatcher("Adminnav.html");
                rd.forward(req, res);
            }
            else
            {
                out.println("<h1>"+ "sorry.... invalid username or password"+"</h1>");
            }
        }
        catch(ClassNotFoundException | SQLException e)
```

```

        {
            out.println(e);
        }
    }
}
catch(ClassNotFoundException | SQLException e)
{
    out.println(e);
}
}
}

```

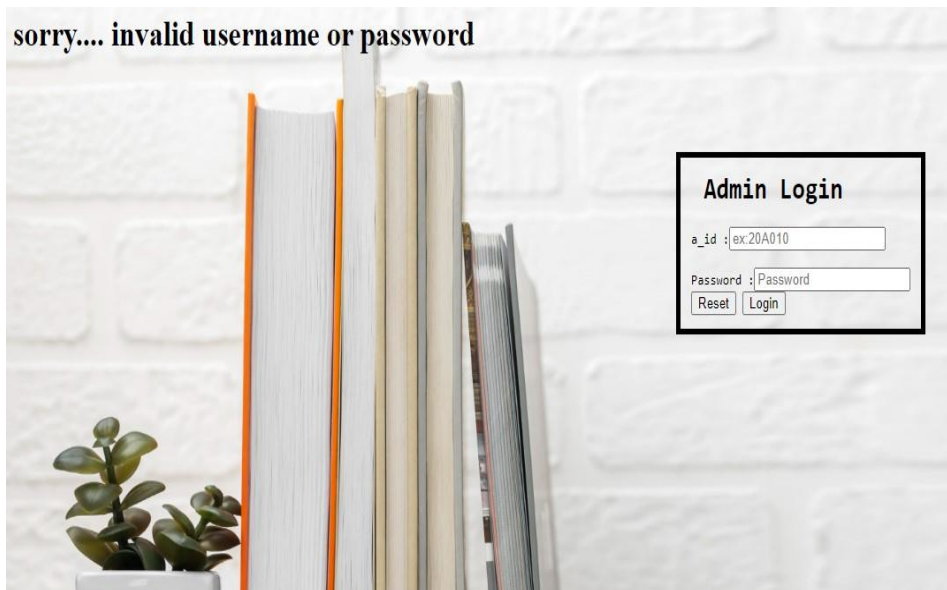

output:

If valid credentials are entered it will redirect to admin page

Otherwise ,it will display ”Not Valid”

7.CONCLUSION

Library management system benefits the students as well as the staff of the library. Staff can search books , staff can generate reports and do book transactions. Implementation of this system will reduce data entry time and provide readily calculated reports.
